

Technical Data Sheet

Hillside Erosion Control™ Fine Fescue & Wildflower Mixture

Description

Hillside Erosion Control™ This mixture contains all fine textured grasses. It provides the best combination of durability and appearance. It exhibits a very fine almost wiry texture and when left unmowed grows to 15 inches high giving a 'meadow' effect. This mixture exhibits a deep green color. This mixture contains wildflowers which add seasonal color to the mixture.

Characteristics

FEATURES:

- Very fine texture
- Germinates quickly
- Dark green color
- Shade tolerance
- Long slender leaf blades

BENEFITS:

- Uniform Growth habit
- Rapid establishment
- Low fertilizer requirements
- Useful in shade mixtures
- Attractive as slope or ground cover

Uses:

Turfgrass mixtures for sun or shade.
Ground cover or slope mixtures for erosion control as an unmowed grass with seasonal wildflowers.

Specifications:

Creeping Red Fescue	98% Minimum Purity
Intrique Chewings Fescue	90% Minimum germination
Minotaur Hard Fescue	400,000 – 500,000 Seeds per pound
Low Profile Wildflower Mix	

Seeding Rates:

New turf or ground cover: 5-7 pounds per 1000 square feet

Establishment:

Emergence: 10-14 days with proper irrigation.
Establishment: 6-8 weeks. Best seeded in Fall, winter and spring.
