

UNHULLED BERMUDA GRASS

Description:

A vigorous, warm season grass which spreads by creeping stolons as well as rhizomes. It is a very prominent grass throughout the southwest. Common bermuda exhibits medium texture and has a more open turf than improved varieties. The 'Unhulled' form means that the hull or sheath has not been removed from the seed. This results in slightly increased germination and establishment time. Although Bermuda should be planted in warm weather the unhulled form can be planted in cooler weather and will become established later.

Characteristics:

Features

- *Outstanding Heat & Drought Tolerance
- *Excellent durability
- *Fast growing during warm season
- *Medium – fine textured
- *Germinates quickly

Benefits

- *Lowest Water needs of any turf grass
- *Ideal for high traffic areas
- *Recovers quickly from injury and wear
- *Uniform growth habit
- *Rapid establishment

Uses:

High Traffic Areas including:

- *Golf Courses
- *Cemeteries
- *Commercial Developments
- *Sport fields
- *Parks
- *High Traffic Residential Lawns

Ideal for high traffic areas. Tolerates wide range of soil conditions. Avoid planting in shade areas, full sun is ideal. As with all warm season grasses it goes dormant in the winter months.

Seeding Rate:

New Turf: 4- 5 pounds per 1000 square feet (175 - 225 pounds per acre).
Overseeding: 2-3 pounds per 1000 square feet (90-125 pounds per acre).
Fall overseed with Grand Slam™ perennial rye grass at a rate of 8 – 10 lb. per 1000 square feet.

Establishment:

Germination: 10 – 14 Days with Proper Irrigation (longer in cooler weather)

Establishment: 6 – 8 Weeks Best seeded April - October

First Limited Use: two week after first mowing depending upon rate of establishment.

Adaptability & Care:

***Climate Conditions:** All (Except for high altitude)

***Soils:** Sandy to heavy clay. Not good for extremely wet or shaded areas.

***PH Range:** 5.5 to 8.5

***Fertilization:** 1 pound of actual nitrogen per 1000 sq. ft./month during the growing season (Apr-Oct).

Use a balanced with a 3:2:1 ration of NPK with sulphur.

***Mowing Height:** 1- 1 ½ inches. Remove thatch as needed.

Ingredients & Specifications:

100% Unhulled Bermudagrass

95% minimum Purity

85% minimum Germination
