

## Technical Data Sheet

# Wildfire Seed Mix #2™

## Description & Specifications

### Wildfire Seed Mix #2

This mixture contains fast establishing, perennial grasses and wildflowers for wildland seeding in areas under 8,000 feet in elevation. This mixture contains species which are CALIFORNIA NATIVES. Description of the varieties used:

**50% *Hordeum brachyantherum* // Meadow Barley:** Rapid establishment and vigorous grower produces dense stands and is useful for forage. Grows up to 30 inches high.

**36% *Festuca rubra molate* / Molate Fescue:** An attractive, drought tolerant grass that mixes well with wildflowers.

**11% *Lupinus succulentus* / Arroyo Lupine & 3% *Eschscholzia californica* / California Poppy:** Popular native wildflowers add winter and spring color as well as soil binding properties.

## Uses

Wildfire Seed Mix #2 This mixture provides excellent erosion control in nearly any location including construction sites, roadsides, and forests recently devastated by fire where native perennial grasses are preferred.

For Natural areas without irrigation, seed during fall and winter in advance of rains. Can be established anytime with irrigation. Perennial grasses can stay green in summer months if occasionally irrigated. Results are best if seed is covered with 1/2 inch of soil. Seeding rates should be increased if soil coverage is difficult or impossible

## Seeding Rates

Recommended seeding rate for this mixture is 43 Lbs per Acre or 1 pound per 1,000 square feet
