Cole Crops for Cooler Seasons

Cooler weather is here and the time is right to plant root and leaf crops. Our brand new Cole Crop Combo Packages have arrived just in time for cool season planting. The name 'Cole,' a term developed prior to the 12th Century, refers to various plants (specifically brassicas) belonging to the mustard family.

Our Cole Crop Combo Package contains:

- Brussels sprouts
- Cabbage
- Cauliflower
- Broccoli

Our Watercress is also ready for planting. An often overlooked, yet high-quality food, Watercress contains significant amounts of iron, calcium, iodine, folic acid, and vitamins A and C.

We also have a new Cooking Greens Combo Package containing other cool season plants:

- Collards
- Kale
- Mustard Greens
- Turnip greens

Greens in Cookery Folklore: Serving greens to guests on New Year's Day is an important Southern culinary ritual. Paired with a black-eyed pea-based dish called Hoppin' John, tradition maintains that greens ensure good luck for the upcoming year.
