New Faster Spreading Perennial Ryegrass Blend

In keeping with our tradition of introducing the latest innovations in Turfgrass breeding, we are pleased to announce the launch of "GRAND SLAM FS" Perennial Ryegrass Blend. The "FS" stands for "fast and spreading".

This ryegrass blend contains three newly developed ryegrass cultivars that exhibit improved rates of germination and establishment (fast) and exhibit exceptional tillering (spreading) growth.

These improved traits are especially useful for sportsfields as the grass establishes quicker and produces a turf with greater density for improved wear resistance. An advantage for golf course use would be less Poa invasion due to the greater density and spreading characteristics of the ryegrasses.

In addition to these new characteristics, Grand Slam FS Perennial Ryegrass Blend exhibits improved disease resistance and excellent turf quality.
