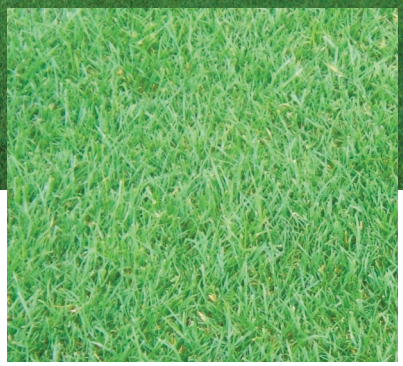
Grand Slam Seed Mixture Gives Municipal Sportsfields Professional Appearance

The City of Irvine takes its recreation facilities seriously. Baseball, softball and soccer fields are open to the public and host multiple user groups on a year-round basis.

To keep Irvine's sportsfield turf in top condition, Head Sportsfield Superintendant Mike Ventura maintains a Bermuda Grass base, and overseeds with Grand Slam Perennial Ryegrass Blend. The vigorous, fast-germinating seed has a great combination of characteristics: fine-texture, insect resistance, a signature dark green color, and drought tolerance. Grand Slam is low-maintenance, and delivers improved turf quality with less need for chemicals and fertilizer.



Grand Slam is a natural for overseeding dormant warm season grasses or for permanent turf on golf courses, sportsfields, cemeteries, parks, commercial developments, and residential lawns. For park managers seeking to give their sportsfields that professional look, Grand Slam proves to be a winner.
